

# Tech Pack Checklist *for Custom Bags*

Use this one-page checklist to prepare a bag project before contacting FFG. A complete tech pack is ideal, but a clear partial brief is enough to begin review, sampling advice and quotation discussion.

## 1. PRODUCT BRIEF

### Bag type and use case

Product category, usage conditions and must-have functions.

### Target user and market

Professional, outdoor, tactical, medical, EDC or another audience.

### Quantity and timing

First order quantity, repeat potential and target delivery date.

## 2. DIMENSIONS AND STRUCTURE

### Overall dimensions

Height x width x depth, plus capacity if relevant.

### Compartment layout

Pockets, sleeves, organizer zones, foam areas and access points.

### Reference material

Photos, sketches, sample or competitor benchmark.

## 3. MATERIALS AND HARDWARE

### Main fabrics

Material, weight, composition, coating, finish and color.

### Lining and reinforcements

Foam, mesh, webbing, binding, back panel and reinforcement zones.

### Hardware and trims

Zippers, buckles, D-rings, hooks, sliders, pullers and preferred brands.

## 4. CONSTRUCTION DETAILS

### Stitching and thread

Stitch type, thread color, bartacks, seam finish and topstitching.

### Critical performance areas

Load points, abrasion zones, water resistance and removable parts.

### Quality expectations

Inspection standard, tolerances, tests or defects to avoid.

## 5. BRANDING, PACKING AND COMPLIANCE

### Branding placement

Logo size, label position, embroidery, patches, print or heat transfer.

### Packaging

Polybag, hangtag, carton marking, barcode, inserts and retail packing.

### Compliance

REACH, PFAS-free, recycled claims, audit or customer documents.

## NO FULL TECH PACK YET?

- Photos or sketches of the idea
- Reference sample if available
- Target quantity and price range if known
- Main use case and must-have features
- Material, certification or deadline constraints
